Product Information

Single Wall Bottles

Single wall stainless steel bottles are available for co-branding a customers logo to the back of our ECOTanka bottles only at this stage. These bottles are light weight and have up to 7 lid types to choose from. If you are wanting full logo printing on any of our bottles, this can be arranged direct from our factory with an allowed time frame.

We have both stainless steel finish and limited painted bottles for printing. All stainless steel bottles can be printed with either white laser or black laser printing. All painted bottles can only be printed with white laser printing.

thermoTANKA Double Walled Vacuum Bottles

thermoTANKA vacuum stainless steel bottles are available for co-branding a customers logo to the back of our ECOTanka bottles only at this stage. These bottles are light weight and have up to 7 lid types to choose from. If you are wanting full logo printing on any of our bottles, this can be arranged direct from our factory with an allowed time frame.

We only have stainless steel finish bottles for printing. All stainless steel bottles can be printed with either white laser or black laser printing.

Bottle Lid Types *(please view our website for pictures)*

For our 350ml bottles we have 8 lid types to choose from, 4 plastic lids and 4 stainless steel lids.

For our 600ml - 1.2L bottles there are 7 lid types, 3 plastic and 4 stainless steel. For our 2L bottles we have 2 lid types, 1 plastic lid and 1 stainless steel lid.

Our plastic lids are all made from a very high grade PP#5 approximately 20x stronger than other common PP#5 lids, non-leaching and fully tested. All lids have German quality silicone seals.

Our stainless steel lids are all made from 304 stainless steel with a solid stainless steel handle, non-leaching and fully tested. All lids have German quality silicone seals.

Stainless steel lids can be laser printed with your logo/name, however this is limited at this stage. If you are wanting full logo printing on any of our stainless steel lids, this can be arranged direct from our factory with an allowed time frame.

Cups

The ECOTanka Grail 350ml cup with ceramic coating on the inside is available for full logo white or black laser printing to a set area on the cup. The cup is stainless steel finish only at this stage.

White Laser Printing

White laser printing direct to stainless steel shows as a lighter colour stainless steel. This lighter colour gives a soft look to the logo making the product stand out more with the logo in the "background". For all painted bottles white laser logo printing is only used. The logo is permanent and will never come off.

Black Laser Printing

Black laser printing direct to stainless steel is not 100% black in colour it is a charcoal colour that appears to look black in colour, you can see this in different light. The black laser printing finish looks sharp and really stands out, putting the main product second to the logo. The logo is permanent and will never come off.

Colour Silk Screen Printing

Colour silk screen printing is only available with orders coming direct from our factory in China at this stage. We can print up to 4 colours subject to logo design and size. For more information about this option please contact us.

For more information or to see the difference in laser printing please visit: www.ecotanka.nz

Customer Logo

Please provide as much details as you can for printing your logo. Follow the steps below.

Logo Size

Please provide an estimated size you would like your logo printed on the product you have selected. We will provide a final drawing for approval before printing.

Height: _____ mm

Width: _____ mm

or our recommendations

Logo Position

Please provide an estimated logo position to where you would like your logo printed on the product you have selected. We will provide a final drawing for approval before printing.

Down from top: _____ mm

up from bottom: _____ mm

or our recommendations

Logo Design Requirements

Your logo cannot have any **sizes smaller than 1.5mm** otherwise it will not show up and be clear to look at. If your logo has **objects crossing over each other** make sure these objects are **“welded” together** in your graphics software so they become one object. Make sure your logo has no “Clipping Masks”. Your logo needs to be in one layer and as curved objects only.

Logo Files Required

Please provide your logo as a vector file converted to curves. Also, provide a .JPG file as a reference file only. (please contact us with any questions regarding these requirements)

File formats we can accept are as follows:
.ai or .eps saved as Illustrator “CS” legacy format
.cdr version 18
.SVGZ
.pdf

Provided Files

ECOtanka can provide the product drawing outline for you to add your logo, set the size and location ready for printing. If you need your designer to prepare your logo we can send the file directly to them.

Designer Name: _____ Email Address: _____

Logo File Set

ECOtanka can provide a service to set your logo to the right format, size and location if you are unsure or do not have a graphic designer.

Please format and configure my basic logo for \$30.00.
Extra charges may apply depending on logo file and design.

Logo File upload

Please upload this form, your vector logo file and your reference .jpg file to our server using the following URL:
<https://www.ecotanka.nz/customlogo>
